

The 7th International Workshop Phenomenology, Organisation and Technology

Organised by the Working Group for Phenomenology, Organisation and Technology (POT)
Ruhr-Universität Bochum

Bochum, Germany, 7 & 8 September 2009

Following the success of the previous International POT Workshops (held in UK (2002), Portugal (2003), Finland (2004), France (2005), Netherlands (2006), UK (2008) the POT Working Group calls for papers and participation for its next event in 2009.

Call for Papers and Participation

As many researchers struggle to give an account of everyday phenomena in organisations, of our ‘being-with-others’ and of our immersion in information and communication technology, which resonate with our actual experience of life, they increasingly turn to phenomenology. Phenomenology provides us with a way to get back to the actuality of the ‘everyday’ life of organized/organizing human beings working in and through the mediation of organization. Phenomenology since Husserl introduced a fundamental critique of western rationality which is focused on building abstract models and deriving action from these abstractions: “a pure thinking’ which remains exclusively within the realm of pure limit-shapes”. With phenomenology Husserl introduces a method, or rather a way of thinking, that provides a renewed and sensible understanding of situations, events, things and human beings. This approach has been seminal to many authors such as Heidegger, Merleau-Ponty, Levinas, Derrida, Henry, and so forth. Through phenomenology we aim to disclose, not facts, but rather the ongoing appearing and meaning of working, speaking and/or informing, organising, planning, decision making, innovating, etc. as revealed in ongoing organisational life. It is with this challenge in mind that the workshop sees its task. The workshop will aim to develop and explore phenomenological analysis and accounts – either applying the phenomenological method of investigation, its techniques, or by grounding research in previous phenomenological findings – of phenomena such as (but not limited to):

- ‘Applying’ or doing phenomenology
- Philosophy of Technology
- Media, mediating and mediation
- Collaboration and cooperation
- Virtualisation of everyday and organisational life
- Connecting and being connected
- Ethics and phenomenology
- Innovation and innovating
- Knowledge, knowing and action
- Organisation and organising
- Organisational language and languaging
- Management and managing
- Contrasting phenomenology with other approaches

The workshop will be limited to 25-30 participants. We intend it to be informal and interactive, for immersion and learning. We welcome contributions from those who have a substantive interest in phenomenology or who are keen to develop such an interest. The overall aim of the workshop is to develop and foster the community of phenomenological researchers in the fields of Organisational Studies, Management Studies, Social Studies of Technology, Information Systems, Communication Studies, Media and New Media, Philosophy, Sociology, etc. If you are interested to participate send an extended abstract (approx. 2500 words) or a full paper to any of the four co-chairs:

Lucas Introna

l.introna@lancaster.ac.uk

Lancaster University Management School, UK

Eric Faÿ,

fay@em-lyon.com

EMLYON Business School, France

Fernando Ilharco

ilharco@fch.ucp.pt School of Human Sciences,
Catholic University of Portugal

Michael Waltemathe

michael.waltemathe@rub.de Faculty of Theology
Ruhr-Universität Bochum

Closing date: ASAP but not later than 15 May 2009

Notification of acceptance: 12 June 2009

Final full papers due: 24 August 2009

Programme Committee (TBC)

Lucas Introna, Lancaster University, UK

Fernando Ilharco, Catholic University of Portugal

Eric Faÿ, EMLYON Business School, France

Annamaria Carusi, Oxford University, UK

Michael Waltemathe, Ruhr-Universität Bochum,
Germany

Walter Lammi, American University in Cairo, Egypt

François-Régis Puyou, Audencia School of Mgt,
Nantes, France

Ken Uchiyama, Daito-Bunka University, Japan.

Louise Whittaker, Univ. of Witwatersrand, South
Africa

Bogdan Costea, Lancaster University, UK

Ian Beeson, University of the West of England, UK
